

ASE-Capstone PPP

Problem Domain

- Many people aren't familiar with terminals
 - difficult to jump in
- A game can teach basic concepts
 - give instant feedback

Solution

- Terminal-based character controller
- Commands that are similar to/the same as real world command lines
- Combat encounters to test knowledge

LoC and Burndown Rate

LoC: 1,568

Requirements: 7 / 7 (100%)

Sprint 2 Features and Requirements

1. A terminal that acts as a controller
 - i. user can create scripts that can allow them to automate/optimize actions
2. Enemies
 - i. AI determined by scripts similar to what the player may create for themselves
 - ii. varying levels of difficulty/complexity of enemies
3. Combat system
 - i. User can test knowledge of commands or efficiency of scripts against enemies
4. Main level
 - i. combat encounters
 - ii. environmental hazards
 - iii. win state

Technical Contribution

- Created a system that parsed and ran user input
- created a system that ran predetermined or player created input
- Create a game scene where the player may test their knowledge

What I learned

- Godot and GDScript
- How terminals run commands
- Game Design
